SMITH 1965 50 2015 YEARS

At Smith, the experience is everything.

Since 1965, we have designed and built goggles right here in the USA. For fifty years we've provided goggles to customers, tinkering at our offices in Idaho and cranking out production at our factory in Utah. Designed, tested, manufactured and enjoyed with pride here in the USA by all of us here at Smith. We hope you get as much out of our products as we do.

SMITH

JEREMY MARTIN

TRAVIS
PASTRANA
inspired design

When we talk about Smith, we talk about ourselves as the Smith Family. Our athletes are an integral part of this family and no one more so than Travis Pastrana. For over ten years, we've been behind Travis, from X-Games and Supercross, to rally cars. This year we introduce a new goggle that he was directly involved in helping us create. This isn't about our business; it's about our family. Smith inspired design.

STRAY FROM
THE BEATEN
PATH

Poler Camping Stuff makes simple, well-designed gear for people that are travelers, couch surfers, real surfers, skateboarders, road trippers, snowboarders, bicyclists, motorcyclists and car campers. It's for people having awesome adventures in their own way. Smith teams up with Poler to create an MX goggle for like-minded roamers and seekers.

MOTOCROSS

INTAKE SWEAT-X

The Intake Sweat-X brings style, performance and fit to the forefront. With super-absorptive F.A.T. 3-layer face foam, custom graphics, and a free Roll Offs system and protective goggle bag, the Intake Sweat-X is superior comfort and performance for the serious competitor or the weekend warrior.

SNOWMOBILE

THE I/OX

Absolutely the most advanced goggle to ever hit the Snowmobile market. The Snow I/OX packs the world's best fog-fighting technology into a frame designed for the ultimate in lens interchangeability.

Maximize your field of vision with perfect clarity through our mirrored Spherical lenses molded exclusively from Carbonic-X material. Fight fog in the most extreme weather Mother Nature can dish out utilizing our proprietary 5X anti-fog material and Vaporator thermal lens technology. Adapt to changing light conditions with ease using our Quick Release lens system. Simply put, the Snow I/OX is the biggest, baddest weapon in the Smith arsenal.

CHANGE IS EASY

The Snow I/OX is the world's most advanced interchangeable goggle. Flip the top switches, articulate the outriggers 90 degrees, pop out the lens and replace it with the new one.

For lens replacement options see page 36

SNOW I/OX

Equipped with the largest spherical lens possible, the I/OX is the biggest, baddest goggle in our Snowmobile line. 5X Anti-Fog technology, unparalleled peripheral vision, easy interchangeability, and perfect helmet integration.

- Medium/Large Fit
- Quick Release Lens System
- Spherical, Carbonic-X Lens with TLT Optics
- High Light and Low Light Lenses Included
- 5X Anti-Fog Inner Lens
- Patented Vaporator Lens Technology with Porex Filter
- Ultra-Wide Silicone-backed Strap
- QuickFit Strap Adjustment System with Stay-Put Strap Retainer
- Extended F.A.T. 3-Layer Face Foam
- Helmet Compatible
- Includes Microfiber Goggle Bag with Replacement Lens Sleeve

- + Holds and Protects Multiple Goggles and Lenses
- + Multiple Pockets on Lid for Storage of Lenses, Tear Offs, Roll Offs, etc.
- + Durable, Molded EVA Skeleton
- + Handle for Easy Transport

FRAME TECHNOLOGY

for the perfect fit

ERGONOMIC OUTRIGGER POSITIONING SYSTEM

The re-engineered Ergonomic Outrigger Positioning System featured on the MX Fuel v.2 is strategically positioned on the frame to draw the strap forward and away from the goggle frame to provide a perfect fit in a wide range of helmet face ports. The outriggers evenly distribute pressure on the goggle frame to create a complete seal on the face, keep dirt out, and allow F.A.T. face foams to soak up sweat.

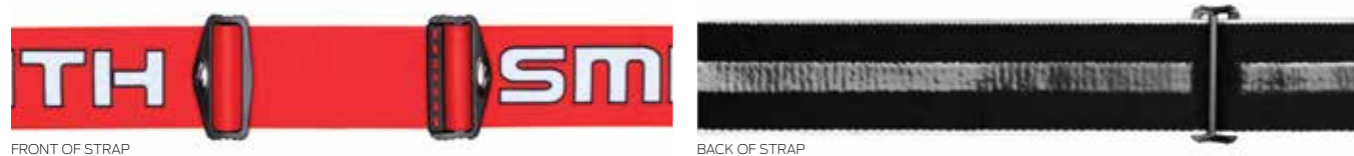

ARTICULATING OUTRIGGER POSITIONING SYSTEM

Engineered to adjust to a full range of face shapes and sizes, the Articulating Outrigger Positioning System evenly transfers pressure across the brow and nose to ensure a complete seal around the face. When used with a helmet the outrigger articulates allowing the goggle frame to sink into the helmet face port, ultimately providing a comfortable and consistent fit every time.

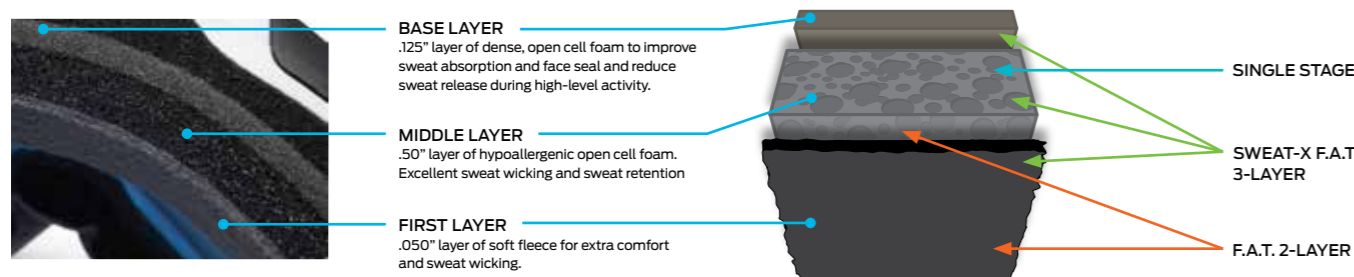

SILICONE-BACKED STRAP

Lock down your goggles with our silicone-backed straps. Our plush, durable straps prevent strap movement on the helmet and ensure a perfect fit every time.

F.A.T FACE FOAMS

Ultra-plush. Perfect fit. Fast Absorption Technology (F.A.T.) equals maximum sweat management. Almost 50% more absorbent than most standard foams, our hypoallergenic performance face foams seal out the elements and eliminate annoying sweat splatter. F.A.T. 3-Layer, F.A.T. 2-Layer, and Single-Stage face foams give you the customized fit and versatility you need out on the track.

FOG FREE VISION

TURBO FAN

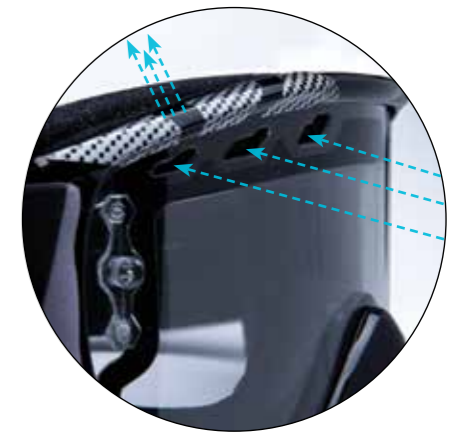

Setting the standard in goggle performance, our 5th generation patented Turbo Fan technology eliminates fog. A silent, 2-speed micro-electronic fan runs continuously for up to fifty hours on a single AAA battery to draw air through strategically placed vents, preventing moisture from setting up shop inside your goggle. The high powered mode can be activated to clear moisture build-up in extreme situations. Sleek, lightweight and hates fog as much as you do.

Turbo Fan patent #'s 6049917, 6047411, 6038707, 5452480

AIR INTAKE SYSTEM

Traditional goggle venting provides a regulated supply of air through the goggle; when you slow down airflow decreases, increasing the potential for fogging. Smith's revolutionary Intake fairings allow the user to increase airflow at these slow speeds by opening the fairings and directing air into the chamber of the goggle. On-demand airflow is now at your finger tips.

ENDURO AIRFLOW

Out with the wet, in with the dry. Active lens ventilation clears fog by maximizing incoming airflow while allowing hot air and steam to escape.

© Smith Sport Optics 2014

AFC LENS (anti-fog coating)

The pre-emptive strike. Pro-active fog slayer. However you want to say it, AFC stops fog before it starts. Smith's Fog-X coating creates a hydrophilic surface that permanently bonds to the inside of the lens to absorb moisture before fog can form.

MX VENT FOAM

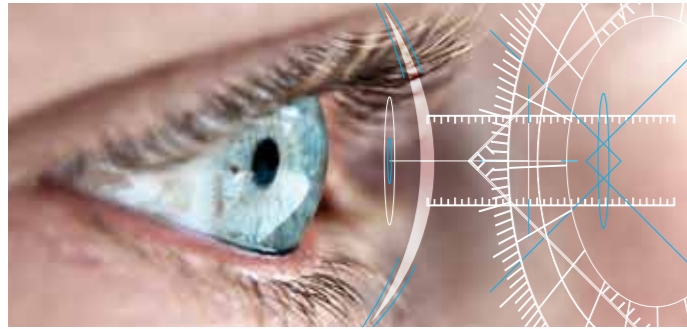

Our micro-porous, 2-to-1 vent foam is specifically engineered to filter out dust and debris while maximizing the circulation of dry, fresh air to prevent fogging.

SANDTRAP VENT FOAM

Developed in cooperation with our top athletes, our proprietary SandTrap vent foam incorporates a 2-layer filtration system that prevents fine particulates like sand from entering the goggle chamber while maintaining the critical airflow needed to prevent fogging. Ideal for ATV enthusiasts hitting the sand dunes and serious racers attacking the most grueling sand tracks.

TLT *tapered lens technology*

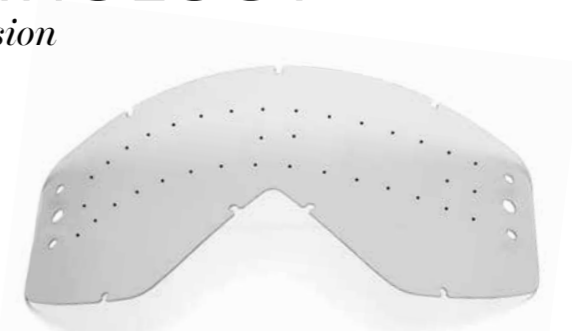

"Objects in lens are exactly the same as they appear." When light passes through a medium it refracts, i.e. changes course. If left uncorrected, this refraction can cause visual distortion and eye fatigue. Smith's Tapered Lens technology (TLT) straightens out the incoming light rays by progressively tapering the lens from the optical center toward the peripheral view. What this means for you is that you see with 100% accuracy and maximum comfort.

OPTICAL TECHNOLOGY *for enhanced vision*

LEXAN™ LENS

Lexan lenses are hard coated to offer unmatched impact and scratch resistance, crystal clarity, and 100% UVA/B/C protection.

XCL LENS

Smith's Extreme Condition Lens (XCL) utilizes an ultra-sonically raised dot-matrix to create an anti-stick surface and enhance film advancement in even the worst conditions. Hard coated to resist scratching and enhance durability, the XCL lens also offers 100% UVA/B/C protection.

IN LENS POSTS

Smith's unique In-Lens post system offers the best of both worlds. In the standard configuration with posts installed in the lens, Tear Offs can simply be loaded onto the lens without fumbling with cumbersome frame clips. Remove the posts to expose pre-drilled holes that allow Smith's legendary Roll Offs film advance system to be installed for clear views in any condition.

PERFORMANCE LENS TINTS

a wide variety of interchangeable lens tints enhance vision in all light and weather conditions.

MIRRORED LENSES:

 **PLATINUM MIRROR VLT : 25% CATEGORY 2**
Special mirror coating provides maximum glare reduction with excellent visibility. Best suited for bright conditions. 100% protection from harmful UVA/B/C rays.

 **RED MIRROR VLT : 30% CATEGORY 2**
Special mirror coating provides maximum glare reduction with excellent visibility. Best suited for bright conditions. 100% protection from harmful UVA/B/C rays.

 **BLUE MIRROR VLT : 30% CATEGORY 2**
Special mirror coating provides maximum glare reduction with excellent visibility. Best suited for bright conditions. 100% protection from harmful UVA/B/C rays.

 **SENSOR MIRROR VLT : 70% CATEGORY 1**
Performance based lens tint with a multi-layer mirror maximizes color definition, increases depth perception, and intensifies light in any condition. Excellent in flat and low-light conditions. 100% protection from harmful UVA/B/C rays.

NON-MIRRORED LENSES:

 **GRAY VLT : 56% CATEGORY 1**
Neutral tint to reduce glare in bright and variable light conditions. 100% protection from harmful UVA/B/C rays.

 **BLUE VLT : 55% CATEGORY 1**
Neutral tint to reduce glare in variable light conditions. 100% protection from harmful UVA/B/C rays.

 **GOLD LITE VLT : 55% CATEGORY 1**
An outstanding multi-purpose lens tint that filters reflected Blue light to provide superior contrast, shadow definition and depth perception in bright, overcast and flat light conditions. 100% protection from harmful UVA/B/C rays.

 **YELLOW VLT : 68% CATEGORY 1**
A vibrant lens tint that brightens terrain while increasing contrast and definition in extremely flat and low light conditions. 100% protection from harmful UVA/B/C rays.

 **CLEAR VLT : 90% CATEGORY 0**
Maximum light allowance for all weather conditions. 100% protection from harmful UVA/B/C rays.

 **BLACKOUT VLT : 10% CATEGORY N/A**
Proprietary dark gray tint designed to maintain accurate color while dramatically reducing glare in bright, sunny day conditions. 100% protection from harmful UVA/B/C rays. *Not available in Europe

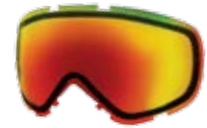

SNOW I/OX LENSES

GOLD SOL-X MIRROR VLT : 7%
Dark sienna brown, Sol-X base lens tint with a multi-layer gold mirror cuts glare and reduces eye fatigue in sunny conditions.
NOT AVAILABLE IN EUROPE

GREEN SOL-X MIRROR VLT : 15%
Dark sienna brown, Sol-X base lens tint with a multi-layer green mirror cuts glare and reduces eye fatigue in bright, sunny conditions.
NOT AVAILABLE IN EUROPE

RED SOL-X MIRROR VLT : 17%
Dark sienna brown, Sol-X base lens tint with a multi-layer red mirror cuts glare and reduces eye fatigue in bright, sunny conditions.

PLATINUM MIRROR VLT : 25%
Rose base lens tint increases depth perception in very sunny to partly cloudy conditions. Platinum mirror coating provides increased glare protection.
NOT AVAILABLE IN EUROPE

IGNITOR MIRROR VLT : 35%
Proprietary universal lens tint designed to reduce eye fatigue while enhancing contrast and depth perception in all conditions. A versatile lens tint designed to be used all season long.

RED SENSOR MIRROR VLT : 60%
Light rose base lens tint with a multi-layer red mirror maximizes color definition and increases depth perception in varying levels of flat light conditions.
NOT AVAILABLE IN EUROPE

BLUE SENSOR MIRROR VLT : 70%
Light rose base lens tint with a multi-layer mirror maximizes color definition and increases depth perception in varying levels of flat light conditions.

BLACKOUT VLT : 10%
Dark gray base lens tint cuts glare and reduces eye fatigue in bright, sunny conditions.
NOT AVAILABLE IN EUROPE

CLEAR VLT : 84%
The ideal lens for night-time use.

*ALL LENSES PROVIDE 100% PROTECTION FROM HARMFUL UVA/B/C RAYS.

*VLT (VISIBLE LIGHT TRANSMISSION):
The percentage of available light allowed to reach the eye (the lower the number, the darker the lens).

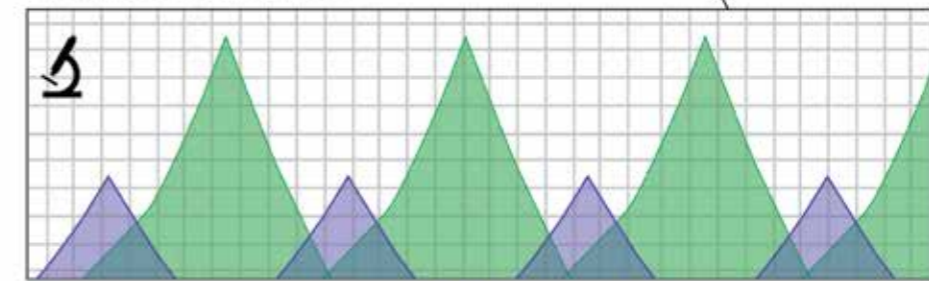

SNOW I/OX LENS TECHNOLOGIES

5X ANTI-FOG *fog? what fog?*

The most advanced anti-fog lens ever created. Building upon the hydrophilic, micro-etched surface area principles of our Fog-X lenses, our revolutionary, new 5X Anti-Fog inner lens has been engineered to provide over five times the absorptive properties of anything on the market. Initial testing showed standard anti-fog lenses fogging between 30-50 seconds. Smith's proprietary, 5X Anti-Fog treatment withstood fogging for over 120 seconds in controlled lab tests.

5X : INCREASED SURFACE AREA CREATED BY

DEPTH OF 5X ANTI-FOG TREATMENT vs. DEPTH OF TRADITIONAL ANTI-FOG TREATMENT

© Smith Sport Optics 2014

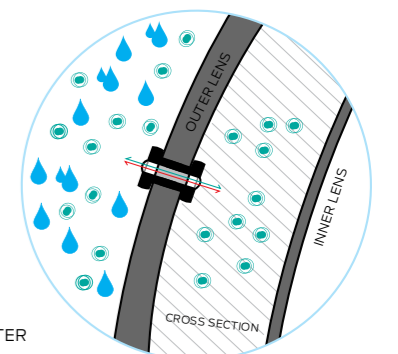

VAPORATOR LENS TECHNOLOGY

The world's strongest thermal lens construction. Patented Vaporator seal and Porex filter permanently bonds two lenses together, allowing the lens to breathe while preventing moisture entry.

POREX FILTER

Patented micro-porous filter allows the thermal lens to draw in air while preventing moisture entry. Combined with our Vaporator lens gasket, the Snow I/OX possesses the most advanced thermal lens construction in the world today.

VAPORATOR LENS GASKET

The most advanced thermal lens construction ever produced. Our patented silicone seal creates an airtight, bomb-proof seal, eliminating lens delamination—the number one cause of between-the-lens fogging.
